

REMARKS

Claims 14-41 are now pending in the application. The Examiner is respectfully requested to reconsider and withdraw the rejections in view of the amendments and remarks contained herein.

REJECTION UNDER 35 U.S.C. § 103

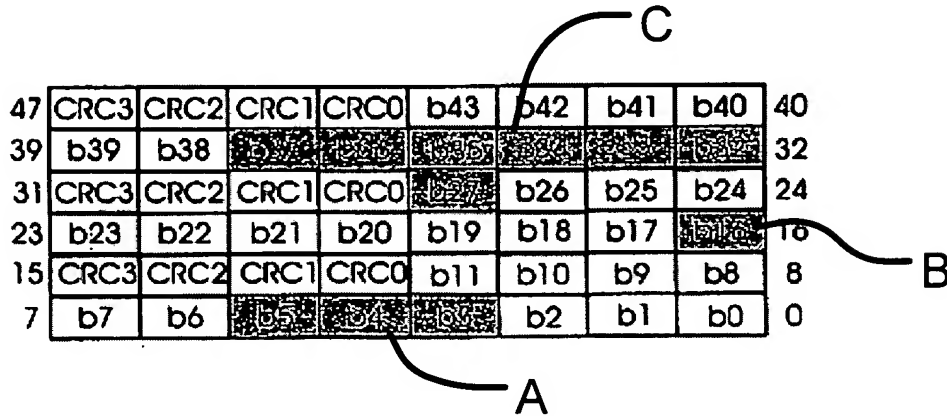

Claims 14-16, 18, 19, 24-26, 28, 29, 31-35, 37, 38, 40, and 41 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Aruga (U.S. Pub. No. 2003/0097525) in view of Budd et al (U.S. Pat. No. 7,003,702). This rejection is respectfully traversed.

With respect to claim 14, Aruga, either singly or in combination with Budd, fails to show, teach, or suggest a queue module that stores data lengths and data start addresses of first and second data segments and a read assembly module that reads a plurality of data blocks and extracts data segments from the read plurality of data blocks based on the data lengths and data start addresses.

It is a longstanding rule that to establish a prima facie case of obviousness of a claimed invention, all of the claim limitations must be taught or suggested by the prior art. *In re Royka*, 180 USPQ 143 (CCPA 1974), see MPEP §2143.03. Furthermore, when evaluating claims for obviousness under 35 U.S.C. §103, all of the limitations must be considered and given weight. *Ex parte Grasselli*, 231 USPQ 393 (Bd. App. 1983), MPEP § 2144.03. Here, the alleged combination fails to disclose the limitations of i) reading a plurality of data blocks and ii) extracting data segments from the read plurality of data blocks based on the data lengths and data start addresses.

BEST AVAILABLE COPY

As shown in an exemplary embodiment in FIG. 2 of the present application, a buffer 111 stores data segments A, B, and C as shown below:

The read assembly module reads a plurality of data blocks that include, for example, data segment A. The read assembly module reads the plurality of blocks beginning at data block 0 and ending at data block 15 (i.e. 16 blocks of data) from the buffer 111. The read assembly module extracts data segment A from the read plurality of data blocks based on a data start address and a data length stored in a queue module.

In other words, the read assembly module reads the entire 16 blocks of data, including the CRC data in blocks 12-15, and then subsequently extracts the data segment A based on the stored start address and the data length. Similarly, the read assembly module reads the 16 blocks of data beginning at data block 16 and ending at data block 31 and extracts the data segment B based on the stored start address and the data length.

The alleged combination of Aruga and Budd appears to be absent of any teaching or suggestion of this structure. The Examiner acknowledges that Aruga fails to disclose a queue module that stores data lengths and data start addresses of first and second data segments. As such, Aruga at least fails to disclose i) reading a plurality of

data blocks and ii) extracting data segments from the read plurality of data blocks based on the data lengths and data start addresses.

Applicants respectfully submit that Budd also appears to be absent of any teaching or suggestion of this limitation. For example, the Examiner notes that Column 23, Lines 23-37 of Budd disclose a queue module that stores data lengths and data start addresses of first and second data segments. The cited portion of Budd states:

Referring now to FIG. 20, shown is an example of an embodiment 900 of a scatter-gather list. A scatter-gather list may be implemented as an array as shown here, a linked list or other equivalent data structures as known to those skilled in the art. In this particular embodiment, an array may include one or more entries in which each entry includes information referencing a particular portion of memory. In particular, an entry includes a PTR field 902a a size field 902b and other information may also be included. The PTR field 902a may be a pointer or an address to a particular buffer area of memory. **Size field 902b indicates the size of the buffer portion identified by the address in the field 902a PTR.** Using this particular data structure, the actual physical location of data or memory locations associated with a logical data buffer may be represented. (Emphasis added)

Initially, Applicants respectfully note that the cited portion does not disclose storing **data lengths of first and second data segments**. In contrast, the cited portion appears to disclose storing **a size of the buffer portion identified by an address**. A size of a buffer portion is not analogous to a data length of a data segment within the buffer portion. For example, a buffer portion may include 16 data blocks and the data length of a data segment in that buffer portion may be 3 data blocks.

Further, the cited portion does not disclose reading a plurality of data blocks and extracting data segments from the read plurality of data blocks based on the stored data lengths and data start addresses. As described above, Applicants' claim 14 is directed to i) **reading a plurality of data blocks**, and ii) **extracting data segments from the**

read plurality of data blocks based on the data lengths and data start addresses.

Neither the cited portion nor any other portion of Budd appears to disclose or suggest reading a plurality of data blocks from a memory and extracting data segments from the read plurality of data blocks as claim 14 recites.

Applicants respectfully submit that claim 14, as well as its dependent claims, should be allowable for at least the above reasons. Claims 24 and 33, as well as their corresponding dependent claims, should be allowable for at least similar reasons.

CONCLUSION

It is believed that all of the stated grounds of rejection have been properly traversed, accommodated, or rendered moot. Applicants therefore respectfully request that the Examiner reconsider and withdraw all presently outstanding rejections. It is believed that a full and complete response has been made to the outstanding Office Action and the present application is in condition for allowance. Thus, prompt and favorable consideration of this amendment is respectfully requested. If the Examiner believes that personal communication will expedite prosecution of this application, the Examiner is invited to telephone the undersigned at (248) 641-1600.

Respectfully submitted,

Dated: January 5, 2007

DATE MAILED:

NOTICE OF IMPROPER REQUEST FOR CONTINUED EXAMINATION (RCE)

The request for continued examination (RCE) under 37 CFR 1.114 filed on _____ is improper for reason(s) indicated below:

- ☐ 1. Continued examination under 37 CFR 1.114 does not apply to an application for a design patent. Applicant may wish to consider filing a continuing application under 37 CFR 1.53(b) or a CPA under 37 CFR 1.53(d).
- ☐ 2. Continued examination under 37 CFR 1.114 does not apply to an application that was filed before June 8, 1995. Applicant may wish to consider filing a continuing application under 37 CFR 1.53(b) or a CPA under 37 CFR 1.53(d).
- ☒ 3. Continued examination under 37 CFR 1.114 does not apply to an application unless prosecution in the application is closed. If the RCE was accompanied by a reply to a non-final Office action, the reply will be entered and considered under 37 CFR 1.111. If the RCE was not accompanied by a reply, the time period set forth in the last Office action continues to run from the mailing date of that action.
- ☐ 4. The request was not filed before payment of the issue fee, and no petition under 37 CFR 1.313 was granted. If this application has not yet issued as a patent, applicant may wish to consider filing either a petition under 37 CFR 1.313 to withdraw this application from issue, or a continuing application under 37 CFR 1.53(b).
- ☐ 5. The request was not filed before abandonment of the application. The application was abandoned, or proceedings terminated on _____. Applicant may wish to consider filing a petition under 37 CFR 1.137 to revive this abandoned application.
- ☐ 6. The request was not accompanied by the fee set forth in 37 CFR 1.17(e) as required by 37 CFR 1.114. Since the application is not under appeal, the time period set forth in the final Office action or notice of allowance continues to run from the mailing date of that action or notice.
- ☐ 7. The request was not accompanied by a submission as required by 37 CFR 1.114. Since the application is not under appeal, the time period set forth in the final Office action or notice of allowance continues to run from the mailing date of that action or notice.

Note: If a request for a continued prosecution application (CPA) under 37 CFR 1.53(d) has been filed in the utility or plant application (including a previously filed CPA) that was filed on or after May 29, 2000, the request for a CPA has been treated as a RCE because the CPA practice no longer applies to such application. The constructive RCE, however, is improper for reason(s) indicated above.

A copy of this notice MUST be returned with any reply.

Direct the reply and any questions about this notice to:

Attorney Docket Number	MP0795

This is a Request for Continued Examination (RCE) under 37 CFR 1.114 of the above-identified application. Request for Continued Examination (RCE) practice under 37 CFR 1.114 does not apply to any utility or plant application filed prior to June 8, 1995, or to any design application. See Instruction Sheet for RCEs (not to be submitted to the USPTO) on page 2.

1. **Submission required under 37 C.F.R. 1.114** Note: If the RCE is proper, any previously filed unentered amendments and amendments enclosed with the RCE will be entered in the order in which they were filed unless applicant instructs otherwise. If applicant does not wish to have any previously filed unentered amendment(s) entered, applicant must request non-entry of such amendment(s).

- a. ☐ Previously submitted. If a final Office action is outstanding, any amendments filed after the final Office action may be considered as a submission even if this box is not checked.

- i. ☐ Consider the arguments in the Appeal Brief or Reply Brief previously filed on _____
ii. ☐ Other _____

- b. ☒ Enclosed

- i. ☒ Amendment/Reply
ii. ☐ Affidavit(s)/Declaration(s)
iii. ☐ Information Disclosure Statement (IDS)
iv. ☐ Other _____

2. **Miscellaneous**

- a. ☐ Suspension of action on the above-identified application is requested under 37 C.F.R. 1.103(c) for a period of _____ months. (Period of suspension shall not exceed 3 months; Fee under 37 C.F.R. 1.17(i) required)
b. ☐ Other _____

3. **Fees** The RCE fee under 37 C.F.R. 1.17(e) is required by 37 C.F.R. 1.114 when the RCE is filed.

- a. ☒ The Director is hereby authorized to charge the following fees, or credit any overpayments, to Deposit Account No. 08-0750

- i. ☒ RCE fee required under 37 C.F.R. 1.17(e) | 05/04/2006 BABRAHA1 00000054 10761786
ii. ☐ Extension of time fee (37 C.F.R. 1.136 and 1.17) | 01 FC:1801 790.00 0
iii. ☒ Other Any deficiency for a fee required under 37 C.F.R. 1.16 or 1.17

- b. ☐ Check in the amount of \$ _____ enclosed

- c. ☒ Payment by credit card (Form PTO-2038 enclosed)

WARNING: Information on this form may become public. Credit card information should not be included on this form. Provide credit card information and authorization on PTO-2038.
